

'Crew Resource Management for Low Level Flight Operations'

Crew Resource Management during low-level operations has similarities but several critical differences when compared to conventional CRM training. The unique situational awareness demands and the ability to work with non-pilot flight crews are just two that need to be considered. The "Crew Resource Management during Low Level Flight Operations" is a multi-media seminar acclaimed by professional airplane and helicopter operators world-wide. It gives low-level flight crews the essential skills needed to safely operate an aircraft while in flight at lower levels.

A brief overview of the topics covered during the course is as follows:

- The "Basic Awareness's" low-level flight crews ***must have*** and maintain while operating at lower levels.
- The unique awareness's needed in flight at lower levels
- Crew Resource Management ***(What the pilot and crewmembers need to do in order to act together as a team in the low-level environment)***
- How Human Factors influence the CRM Environment
- Effective Crew Communications
- Aeronautical decision making ***(Based on the operators unique operating environment)***
- What Situational Awareness means in the low-level flight environment
- Single Pilot Operations
- Authority of the Pilot in Command
- Recognizing Fatigue /Stress
- The responsibilities of each crew member.
- Why the crewmember is so important regarding safety during low-level operations.
- In-flight communications.
- Traps waiting for untrained low-level flight crews.
- Additional dangers during low-level operations.

We offer a 4 hour or full day course which can be tailored to your company's unique operational needs.
